SUMMARY

Experienced iOS engineer with 15+ years of hands-on mobile development and almost 20 years in the tech industry. I've contributed to the launch of 50+ iOS applications, working across 10 diverse teams—from startups to larger product organizations—using Swift, Objective-C, SwiftUI, and Combine. Throughout my career, I've taken initiative in improving architecture, modularity, and code quality. I've led technical discussions, facilitated engineering meetings, and advocated for clean code practices aligned with Apple's Human Interface Guidelines. I enjoy translating product goals into elegant solutions and collaborating closely with cross-functional teams.

EXPERIENCE

Sr. iOS Developer 12/2025 - Present
[FDJ United](#)

Build iOS features in Swift, applying **SOLID principles** and modern concurrency
Write high-quality, scalable code
Design solutions from requirements
Collaborate with cross-functional teams
Review code to enhance technical quality

Sr. iOS Developer 07/2024 - 12/2025
[Mendi.io](#)

Developing and maintaining the **Mendi iOS application**, enhancing user experience through **SwiftUI** and **modern iOS frameworks**.
Collaborating with **designer, and product manager** to improve app functionality and integrate new features.
Refactoring and modularizing the codebase for better scalability, applying **SOLID principles** and **Clean architecture**.
Writing **unit and UI tests** to maintain high test coverage and ensure app stability.
Improving app **performance and efficiency**, optimizing memory management with modern concurrency (**async, await**)

Sr. iOS Developer 04/2023 - 04/2024
[Qbtech](#)

- Maintained iOS customer experiences.
- Managed app development infrastructure and releases.
- Improved code efficiency and memory management.
- Ensured security best practices.
- Provided technical guidance to the team.
- Collaborated with engineers, product, and design teams.
- Focused on quality and customer experience.
- Participated in code reviews.

iOS Consultant 06/2021 - 11/2022
[Doktor.se. Stockholm](#)

- Developed features using SwiftUI and Combine for a white-labeled application.
- Facilitated guild meetings to align technical and business objectives.
- Prepared and delivered presentations to engage stakeholders.
- Employed project management tools such as Notion, Jira, and Miro.
- Provided technical guidance to the team.

iOS Consultant 01/2021 - 06/2021
[Fishbrain, Stockholm](#)

Assisted the iOS team to help take some pressure off of their tech backlog. Also participated in creating logger feature using Objective-C, UIKit.

STRENGTHS

- 💎 IT professional
Since 2006
- 💎 Creating iOS apps
Since 2010
- 💡 Skilled in PM and UX/UI
In addition to engineering
- ❤️ Mentoring
Facilitation of tech meetings and more
- 💎 Liaison
Between Product and Engineering

EXPERIENCE

iOS Consultant 10/2020 - 01/2021

[Blocket, Stockholm](#)

Assisted iOS team to maintain and fix current backlog tasks using Objective C.

iOS Consultant 01/2020 - 09/2020

[Spotify, Stockholm](#)

Joined the UBI team at Spotify to assist with a new framework integration impacting around 40 teams. This project required a comprehensive understanding of IT infrastructure, meticulous planning, and effective communication to ensure seamless integration and alignment with business objectives. For some teams, I created detailed specifications and integrated the framework into their codebases. For others, I prepared and delivered presentations, provided relevant documentation, and acted as a front desk resource. Utilized Objective-C and Swift for development tasks.

iOS Consultant 06/2019 - 10/2019

[Zensum\(Klira\), Stockholm](#)

As a lone iOS developer, my aim was to craft an application from inception. Recognizing the pivotal role of design in shaping a disruptive product, I engaged in extensive discussions to refine UI/UX choices. Drawing from engineering design principles, I adopted the MVVM architecture, modularizing the app's logic into components such as networking and persistence layers. Additionally, I implemented functionalities for keychain management, user settings, JSON parsing, and logging, along with enhancing views and model-view layers with useful extensions. Close collaboration with senior management was essential when deciding between native iOS development and hybrid options like React Native.

iOS Consultant 04/2018 - 02/2019

[Bontouch, Stockholm](#)

Developed Postcards app and added features to SJLabs app using native iOS frameworks. Implemented persistence layer to save postcards and user details on device with CoreData framework. Implemented services with REST API endpoints in Objective-C. Introduced and applied a tool to have clean and readable codebase SJLabs app.

iOS Consultant 01/2018 - 04/2018

[EasyPark, Stockholm](#)

Assisted iOS team to maintain and fix current backlog tasks using Objective C. Initiated and facilitated discussion on current iOS topics on improving modularity of code. Closely used Clean architecture.

iOS Consultant 08/2017 - 12/2018

[Spotify, Stockholm](#)

I have been working on Spotify iOS app using Objective-C. In addition to bug fixes, I managed to address some part of iPhone X issues and improve test coverage for some features. It was exciting to learn how manage the codebase when over 40 teams cooperate to address business requirements.

iOS Consultant 03/2017 - 06/2021

[O+X, Stockholm](#)

OX invited me to Sweden for assignments in mentioned period.

Sr. iOS Engineer 01/2016 - 01/2017

[Energise Global Services, Yerevan, Armenia](#)

Created banking application, similar to SWISH for French and Dutch banks using MVVM and RxCocoa, using Objective-C and UIKit.

EDUCATION

Master in Computer and Information Science 01/2004 - 01/2006

[American University of Armenia](#)

Math Methods and Transaction Analysis in Economy 01/1996 - 01/2001

[Yerevan State Institute of Economy](#)

VOLUNTEERING

Volunteer

Woman in Tech

2022 - 2022

Women in Tech Sweden is a non-profit organization, supported by some of Sweden's largest and most influential businesses who share the mission to inspire more women to choose and stay in tech.
